Objective

Motivated IT undergraduate with expertise in OOP and strong problem-solving skills, eager to apply technical knowledge to meaningful projects while gaining hands-on experience. Driven to develop creative solutions for complex challenges, I thrive in collaborative environments and focus on long-term growth and impactful results.

Experience

- Intern (CRT) - Infrastructure | HCL Technologies   2022 Feb-Nov

Gained foundational knowledge of Operating Systems (Windows and Linux), Database (SQL), and developed proficiency in Networking concepts and practices.

Education

B.Sc(Hons) in Information Technology (Pursuing) - Horizon Campus   2022-Present

Skills

- Language: HTML, CSS, JavaScript, Java, Python, C#, PHP
- Libraries: React.js, Pandas, Numpy, Scikit-Learn, Matplotlib, TensorFlow
- Soft Skills: Critical Thinking, Problem Solving, Team Work, Communication Skills

Projects

- Developed a Comprehensive Sales and Inventory Management System using C# : enables to effectively manage sales, inventory and product orders. (Github Link)
- Exam Seat Arrangement System : Standalone Swing application, developed using Java, which allows universities to plan and schedule exam seating arrangements efficiently. (Github Link)
- Hill and Valley Prediction :Developed a ML model to predict whether a given set of 100 points on a 2D graph forms a hill or valley. (Github Link)
- CollegeNexus: This android mobile application is designed to notify users about campus events. Students can stay informed about crucial events on campus and easily plan their schedules. (Github Link)

Certificates

- Web Designing by Freecodecamp
- Web Design by (CODL) University of Moratuwa
- Python for Beginners by (CODL) University of Moratuwa
- Artificial Intelligence: Ethics and Societal Challenges - Coursera, conducted by Lund University
- AI and ML internship by YbiFoundation
- Diploma In English - British Way English Academy - Kandy   2017
